Other conditions:

THIS IS A NEW CONTRACT

Bid No. LK3910

USAGE FIGURES ARE TO BE SUBMITTED ANNUALLY TO LEO KOOPMANS AT STATE PURCHASING.

This contract covers only those items listed in the price schedule. It is the responsibility of the agency to ensure that other items purchased are invoiced separately. State agencies will place orders directly with the vendor (creating a PG in Finet) and make payments for the same on a PV referencing the original PG. Agencies will return to the vendor any invoice which reflects incorrect pricing.

**PRICING**

UNIT PRICE (INCLUDING FREIGHT) \$84.95

PRICE IS THE SAME NO MATTER WHAT THE QUANTITY.

SPECIFICATIONS FOR POLICE ANTI-THEFT SYSTEM**GENERAL:**

It is the intent of these specification to describe an Anti-Theft system designed specifically for use with Police Vehicles. The system must provide Police Vehicle Anti-Theft protection while vehicles are unattended with engines running. The Anti-Theft system in addition, shall protect the said vehicle while it is not in use with the engine not running, rendering twenty-four hour protection. The Anti-Theft system will not in anyway be installed by means of cut or splice methods to existing manufacturer wiring that could create voided warranty issues. Only plug in systems are acceptable.

SPECIFICATIONS:

- 1) The Anti-Theft system will turn on automatically every time the vehicle shift lever is placed in the park position.
The system shall not require a key or switch to activate whereas quick departures are common in police procedures.
This technology enhances 100% usage.
- 2) With the motor running and the Anti-Theft system installed, the automatic transmission shift lever won't move out of the park position.
- 3) Motors, of a parked vehicle, with the Anti-Theft system will be capable of starting but the shift lever will not move out of the park position as in #2.
- 4) The Anti-Theft system shall be deactivated by means of a not easily identifiable covered hidden floor switch system made of rubber material that has no electrical wires to sustain water damage.
- 5) The Anti-Theft system shall be simple in design and require minimum time to install by state personnel. No specialty tools required.
- 6) The Anti-Theft system shall include detailed quality installation instructions and if requested, on site installation training at the agency facility by the vendor.
- 7) Warranty must be at least one year from installation for all parts.

REPORTS:

THE CONTRACTOR WILL SUBMIT ANNUAL REPORTS TO THE STATE PURCHASING AGENT SHOWING QUANTITIES AND DOLLAR VOLUME OF PURCHASES BY EACH STATE AGENCY AND POLITICAL SUBDIVISION.
